

## **Engineering EVs for Edexcel**

We have opportunities for Engineering specialists to train as external verifiers for the following qualifications: NVQs, Apprenticeships and BTECs.

We require experienced assessors and internal verifiers to help quality assure our NVQs in Engineering. You must hold, or be working towards, the relevant NVQ qualifications and have relevant industrial experience in the sector.

We are also recruiting NVQ assessors and internal verifiers to train as EVs for our Apprenticeships in Engineering. You will also be expected to verify related BTEC units in your sector, and to moderate Key Skills Numeracy and Literacy. Full training and support will be provided in all three qualification areas.

Being an external verifier can inspire fresh ideas, give you valuable insight into national standards and enhance the quality of provision within your own centre.

For details, and for opportunities to train as a external verifier for our BTEC qualifications please visit:
